

Akshat Shah

SOFTWARE ENGINEER

📞 +(91) 8780129176 | ✉ akshatshah11111@gmail.com | 🌐 github.com/LaterDisciple05 | 📍 India

INTRODUCTION

- Currently pursuing B.Tech in ICT domain, with growing interest towards software development after gaining hands-on exposure in both software and hardware fields.
- Data Analytics, Data Science and Machine Learning being central areas of interest.
- Inclined towards serving communities, companies and society by learning new technologies and effectively implementing them to improve and facilitate existing systems.
- Passionate about understanding real-world problems and working in the direction of building impactful solutions.
- Maintains a balance between exploration and practical implementation of knowledge while continuously improving existing skills and learning emerging technologies.

PROJECTS

AutoVenipuncture (Automatic Vein Detection and Venipuncturing System)

- IEEE HackX Hackathon (2025) winning project inspired by a real healthcare problem. Used image sensing technologies and image processing concepts to obtain annotated vein images of elderly people, obese patients, infants and dark skin complexions where vein detection is difficult. Rebuilt SO100 robotic arm concepts to automate the venipuncturing process. Gained exposure to imitation learning, ML model training and robotic automation concepts.

Matlar (Solar Power Optimization)

- IEEE MATLAB Hackathon (2024) 2nd place holder project. Worked with real datasets from Pixon Solars to build a software solution capable of recommending optimal solar panel configurations based on location, panel type and tilt orientation while also estimating required number of solar panels.

BPDS - Bus Pass Detection System

- Developed a concept for an autonomous system capable of verifying bus passes, automating fine generation for expired passes and enabling online renewal processes.

Minimal Retrofit Home Automation (SmartGruh)

- Focused on improving safety and reliability of existing home automation systems while introducing features such as appliance power monitoring and improved user experience with the aim of creating affordable and scalable home automation solutions.

ICTBot (Ongoing Robotics Learning Project)

- Part of robotics initiatives within ICT department involving concepts such as Reinforcement Learning, Imitation Learning and Robot Operating System (ROS). Worked on redesigning and experimenting with robots including SO100 robotic arm and TurtleBot platforms.

EDUCATION

Completion of 10th from M.V. Dhulashia & JHC Trust Schools	Result: 97.05 PR
Completion of 12th from Shakti School	Result: 92.5 PR
Cracked JEE Mains	Score: 93 PR
2 Years in Information and Communication Technology, Marwadi University	CGPA: 9.5

SKILLS

Programming & Development: C, C++, Python, Java, R, MATLAB, Unity Game Development

AI, Robotics & Computer Vision: OpenCV, Reinforcement Learning, Imitation Learning, Robot Operating System (ROS), Image Annotation using Labelbox

Data Analytics & Visualization: Seaborn, Plotly, Matplotlib, Plotnine, Tableau, Power BI, Excel, Data Analytics using Python

Software & Platforms: Google Colab, GitHub, MS Office

Professional Skills: Leadership, Problem Solving, Marketing, Public Relations, Communication, Convincing and Presentation Skills

Languages Known: English, Gujarati, Hindi

EXTRA CURRICULAR & STEM ACTIVITIES

IEEE WIE MEFGI SB Secretary	2024 – Ongoing
Tech Lead of Data Science Club @ Marwadi University	2025 – Ongoing
Represented Hindustan Aeronautics Limited as Student Group Lead @ Vibrant Gujarat	2026
Member of ICT Media Team	Ongoing
Served as Mentor for Science and Technology Fair by Students @ Westwood School	2025
Public Relations Head of HackerRank Community @ Marwadi University	2026 – Ongoing
Student Ambassador of Internshala @ Marwadi University	2025 – Ongoing
